FYI. Map showing low, medium and high potential oil and gas areas in the Monticello RMP planning area. As you can see, the majority of the monument is either low to moderate potential for Oil and Gas.?

Statement: BLM Data shows low to moderate potential for Oil and Gas development in the original Bears Ears National Monument Boundary. Given the low potential, the industry has not shown an interest in exploring this area.?

This is from the Monticello RMP. It doesn't have the BENM boundaries on it, but there are enough place names to see that the majority of the former monument was either low or moderate potential for O&G.?

I think more specific that says whether the potential is "low" "medium" or "high" or anything that shows whether industry is or isn't interested in exploration or permitting.
